

RV Endeavor Data Summary
Cruise 6/18/2010

Review Date 6/19/2010

Summary:

The RV Endeavor is en route to its first sampling site location. They are still waiting on the finalized QA/QC plan. Dunk tests were conducted with the CTD and Sentry equipment to ensure proper operation prior to sampling. On the way to the first sample location, three (3) drifters were deployed for NOAA fisheries.

The first CTD cast will commence at 0630 on 6/19/2010.
